

## **Tomorrows Office Manufacturer's agency commission system**

In 2003 our client, a procurement company for a number of national and international retail chains within the UK, required a system to manage their multiple agency commission structures within their client and supplier portfolio. In addition, the system had to handle the order tracking of products and the system also had to operate on a multi currency basis for the production of invoices and costs analysis.

Today the system remains integral to the efficient running and control of the order procurement processes employed within this company.
