

## **Tomorrows Office - Retail pharmaceutical system.**

Initially approached by Business Link Yorkshire to provide a software solution for this well established client.

The client owns a number of retail pharmacies and required a system to control central purchasing and branch stock replenishment linking directly into Sage.

Branch orders are uploaded to the central database and the system can automatically swap requested items to the preferred/alternative items as defined by head office.

Picking lists and delivery notes for the branches are printed prior to despatch of goods.
